<b>Type of event</b>	Discussion forum
<b>Venue</b>	Room 302
<b>Date/Time</b>	Tuesday, June 18; 15:30-17:00
<b>Event description</b>	
<p>Social Forestry (SF) in ASEAN countries had been applied for decades naturally by community who lived in inside and around forest through community empowerment activities to achieve SFM. Some best practices are applied in ASEAN countries e.g. establishment of payment for forest environmental services in Vietnam; development of food security system through distribution access legal for community to manage land and forest in Thailand and Indonesia; management of honey bee in Cambodia; Indonesia takes a lead in establishing ASEAN Working Group on Social Forestry (AWG-SF) as a platform to share information and knowledge about SF in ASEAN Countries. There are plenty good practices that could be shared, including the utilization of technology, access to the market, environmental services. Moreover, to monitor SF activities on the ground, Indonesia constructs evaluation and monitoring system introduced as 4.0 SiNav, an android-based Navigation System for SF. Through SiNav, data and information of SF can be easily accessed. Indonesia responses this opportunity as a strategic event to deliver SF implementation in ASEAN and to exchange learning experience in applying activities related SF. Through Directorate General of Social Forestry and Environmental Partnership (DGSFEP)-Ministry of Environment and Forestry, Indonesia together with ASEAN Working Group for Social Forestry (AWG-SF) and Korean Forest Service (KFS) propose to host side event in stream 2: People and Forest Living in Harmony with the title “Social Forestry in ASEAN Countries: Lesson Learned of Social Forestry in ASEAN Countries” aims to share good practices of SF implementation in ASEAN countries.</p>
